

# HEFEL UNDERBEDDING COMPLETES THE COMFORT OF REFRESHING SLEEP

Unfortunately the importance of underbedding is all too often underestimated. In fact underbedding simultaneously fulfils several functions needed for ideal sleeping comfort: It provides warmth, ensures the best hygienic environment for sleep and offers a particularly soft surface to lie on without lessening support from the mattress. HEFEL underbedding provides heat insulation and rapidly disperses moisture from the body. In the winter no warmth is lost, in summer a build-up of heat or moisture is prevented.

By contrast a mattress alone can hardly absorb any moisture and offers no protection against unpleasant cold draughts. As HEFEL underbedding is extremely easy to care for, it also makes a valuable contribution to a hygienic sleeping environment. It can easily be washed or aired and also reduces mattress wear and tear. The functional characteristics of HEFEL underbedding perfectly complement the corresponding quilts and pillows.

- HEFEL SOFTBAUSCH HOSPITAL**
- Fabric: 50/50% cotton/PES
  - Filling: 100% HEFEL PES Softbausch hollow fibres
  - Care: 95°C washable, suitable for tumble driers
